In the initial Skype session I usually take about 10-15 minutes to feel your resonance and wounds. This is the time you can share your story and ask questions. Then we move into what needs to be addressed as I want to make the best use of your time. I work with spirit and usually it's a combination between spirits and my guidance. If they really want to share something strongly I move out the way so they can come through. There is no particular being that comes through as they refer to themselves as 'We'. I call them my 'Inner Kin'. They are here to be of service. The energy is always benevolent. Feel free to record the session and share absolutely anything, no matter how strange, traumatic or far out it sounds. There is no judgement in how far your vision or experience goes. Inner journey work is possible through Skype as long as you can find a comfortable position to lean back and keep the screen supported.
